Maximum Marks	

Solution Architecture:

- **Home Page with Content Browsing:** A main page displaying various genres and featured content.
- **Content Detail Page:** A dedicated page where users can view details and watch trailers or previews.
- **Media Player Integration:** Embedding a video player with options for playback control, resolution adjustment, and full-screen mode.
- **Search and Filtering Options:** Enabling users to search by genre, release year, or popularity.

Additional Features for Better User Experience:

- **Recommendations:** Based on viewed content, suggest related or trending titles.
- **Responsive Design:** Ensure compatibility across devices, from mobile to desktop.
