Requirement Gathering and Analysis Phase

Solution Requirements (Functional & Non-functional)

Date	
Team ID	
Project Name	**StreamSavvy: Your Ultimate Entertainment Destination**
Maximum Marks	

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Search and Filter Content	- Implement a search function to find content by title, genre, or actor. - Provide filters to sort content by genre, language, release date, and rating.
FR-2	Playback and Streaming Management	- Enable seamless video streaming with adaptive quality. - Integrate video playback controls (pause, rewind, fast-forward). - Add options for subtitles and language selection.
FR-3	User Profiles and Watch History	- Allow multiple user profiles per account. - Track and display watch history for each profile. - Offer options to resume playback from the last watched point
FR-4	Notifications and Alerts	- Send notifications for new content, personalized recommendations, and subscription renewals. - Allow users to manage notification preferences.

FR-5	Content Discovery and Recommendations	- Develop an algorithm to recommend personalized content based on viewing history and preferences. - Enable users to save and bookmark favorite shows/movies.
